GENeco Safety Health Environment and Quality (SHEQ) Policy

Our purpose is to transform waste, discarded resources, into truly sustainable products such as bio-fertilizers, and renewably-sourced gas and electricity – essential energy to power our communities; from homes and businesses to cars and buses. Quite simply, we make resources work

This policy is a set of commitments in which we outline the intentions of GENeco to support and enhance our SHEQ performance. Consistent with our guiding principles, this policy will provide a framework for setting objectives. This will enable us to review, monitor and improve the management of our activities on a regular basis.

Our commitments are as follows:

- To complement the work of Wessex Water, its policies, aims and values.
- Control emissions to land, water and air, to prevent pollution.
- Conserve and protect the environment, biodiversity and ecosystems from harm and, wherever possible, improve it through the services we provide.
- Continually assess our activities to identify areas where we can reduce environmental impacts. Reduce risks from safety and health hazards for users of our operation and others in the vicinity.
- Adopt the highest SHEQ standards in all areas, comply with and where possible better all relevant European, national and local codes, consents, standards and directives.
- Continually improve our management system to enhance safety, health, environment and quality performance.
- Operate in a socially and ethically responsible manner.
- Engage, collaborate and grow with our stakeholders. Satisfying all applicable requirements and obligations, solving challenges together and expanding the circular economy network.
- Leading the way and promoting climate change mitigation and adaptation.
- Networked knowledge – collect, digest and translate the ‘ocean of knowledge’ into the development of practical and innovative solutions to problems.
- Continue as an internally and externally connected business that looks outwards not inwards
- Develop resilience to ensure that we are prepared for and business continues as usual during any emergencies.
